

# Hydraulic Sprint Saw 910203

INNOVATIVE DESIGNS FROM RACINE RAILROAD PRODUCTS

## Fastest Hydraulic Rail Saw in the Market

The Racine SprintSaw will provide gasoline type performance by cutting 132 lbs rail in less than 1½ min.

- The saw uses a cog-belt driven design to produce proper 16” abrasive wheel speed to optimize rail cutting.
- This lessens the chance of wheel “glazing”, not available with other hydraulic models.

## Ergonomically Designed

- Unlike other hydraulic saws, the SprintSaw’s 10 GPM @ 2000 psi hydraulic motor is located near the pivot point for ease of cutting.
- Adjustable 3-position assist handle for operator comfort.
- Spring assist rail clamp assembly helps carry the weight of the saw when cutting to lessen back fatigue.
- Assist handle can be adjusted for left or right-handed operators.

## Specifications

Circuit	10 GPM @ 2000 PSI
Length	40 inches
Width (without rail clamp)	17 inches
Height	17 inches
Weight (without rail clamp)	40 lbs

## Safety Features

- Over-speed valve protects the motor and blade from excessive rpm.
- Convenient handle with trigger automatically stops the tool when released.
- Safety trigger lock to avoid unplanned operation.
- Wheel guard to deflect sparks away from the operator.

## Flip Over Feature

- The SprintSaw can be flipped over without removing from the rail clamp.
- This allows the operator to finish a cut from the other side, reducing cost by extending blade life.
