

Hydraulic Tie Tamper

Product # 910198

The Tamping Tool's spring-dampened anti-vibration handle isolates the tool's vibration, which reduces operator fatigue and increases productivity. Efficiently compacts ballast quickly at 1500 blows per minute. The spring-loaded bit keeper allows the bit to be backed out even when driven deeply into the ballast.

Key Features:

- Innovative anti-vibration technology protects the operator for a more comfortable and productive workday
- Bi-directional AV handles minimize bone-jarring vibration during removal from ballast
- Reciprocating action helps the tool pull itself out of the ballast and so reduces potential back strain
- Includes: whip hoses, couplers, and dust caps

Options:

- Tool steel is available in various lengths to accommodate different operators

Specs:

- Circuit: 5 GPM @ 2000 PSI (~19 LPM @ 138 bar)

Dimensions:

Length: 39.75 in. (~100.9 cm)

Width: 17 in. (~44 cm)

Height: 6 in. (~15.2 cm)

Weight: 56 lbs (~25 kg)
