

Racine Abrasive Wheels

INNOVATIVE DESIGNS FROM RACINE RAILROAD PRODUCTS

One Wheel For All Rail Saws

- Racine Abrasive Wheels can be used with any fixtured rail saw on the market with typical longevity of four to six cuts, or more.

Save on Inventory Cost

- Reduce the cost of stocking multiple wheel types specific to one model saw.

Durable

- On 132 lb standard rail, the 16" wheel delivers up to 5 cuts per wheel without turning the saw around.
- Up to 7 cuts when the cut is finished from the other side.

Trueness

- The Racine Abrasive Wheel edges are “dressed” at the factory to ensure every wheel has excellent roundness.
- A smooth edge for a more accurate and efficient cut right from the start of a new wheel.

Accurate

- Retains excellent tolerances in square-ness of the cut, vertically as well as horizontally

Racine Abrasive Wheel on a Ultra Kut III rail saw.

469933 Model

Specifications: 14" Wheel / Model 469935

Abrasive Material	Aluminum Oxide
Blade Diameter	14 in. (355 mm)
Blade Thickness	5/32 in. (4 mm)
Arbor Hole Diameter	1 in. (25.4 mm)
Maximum Speed	4800 RPM

Specifications: 16" Wheel / Model 469933

Abrasive Material	Aluminum Oxide
Blade Diameter	16 in. (400 mm)
Blade Thickness	5/32 in. (4 mm)
Arbor Hole Diameter	1 in. (25.4 mm)
Maximum Speed	4800 RPM
